*Can Video Games be used to predict or improve laparoscopic skills?*

“Video Games aptitude appears to predict the level of laparoscopic skill in the novice surgeon.”

Rosser JC Jr et al
*The impact of video games on training surgeons in the 21st century.*

“Video games may be a practical teaching tool to help train surgeons.”
1 “doceo - docui – doctum”
2 «διδάκτωρ»
to instruct, to teach

Lifelong Learning attitude for a clinician:

- Where shall I look?
- How can I do better?
- How well did I do?

Start here!

Identify Needs
Assess - process - outcome
Self Assessment ability

sufficient  deficient

over estimate  under estimate

Developing Reflective Skills:
- practice!
- Interaction
- Feedback
Mucogingival problems

The patient, a 42 year old male, is esthetically disturbed by extensive retraction of the gingiva at all four canines and the left lateral in the upper jaw. The overall periodontal status is very good.

Please provide for the case:
- Diagnosis
- Differential Diagnosis
- Prognosis
- Treatment plan

This is your response to the case:

I think my diagnosis for this case is Gingival Recession due to insufficient oral hygiene.
I believe one has to differentiate between the recession as a result of inappropriate tooth-brushing and the recession as a result of inflammation.

The prognosis is good but we have to interfere early and prevent further establishment of the inflammation. Also we need to inform the patient and educate him in the methods appropriate to maintain his oral hygiene at a high standard.

This is what another colleague responded in this case:

I think my diagnosis for this case is Gingival Recession due to insufficient oral hygiene.
I believe one has to differentiate between the recession as a result of inappropriate tooth-brushing and the recession as a result of inflammation.

The prognosis is good but we have to interfere early and prevent further establishment of the inflammation. Also we need to inform

Please compare your response with this of your colleague’s.
Focus in
- differences and why do you think they occur?
- Similarities
- Do you think you need to know anything more in order to effectively decide on this case?
